Telesensory Video Magnifiers - Read & Write Again!

Do you Struggle?

Do you struggle when writing checks or reading the newspaper? You're not alone! There are millions visually impaired persons with vision impairments significant enough to interfere with reading, writing and everyday viewing tasks.

We Can Help!

We offers the full range of Telesensory video magnification aids to assist people with low vision needs. We specialize in video magnifiers, which are electronic based assistive devices used by partially sighted persons for reading, writing and viewing small objects. Video magnifiers are consistently recommended by eye care professionals, and their use will allow people with even severe vision loss to lead more full and independent lives.

Video Magnifiers, also referred to as Closed-Circuit Televisions (or CCTVs), enlarge text and other objects. They also increase the contrast and visibility of just about anything that is viewed with them. People with low

vision due to macular degeneration, diabetic retinopathy, cataracts, glaucoma, etc., depend on video magnifiers to help them with an unlimited number of day-to-day tasks.

What is Manual-Focus?

Some magnifiers are available as manual-focus cameras which means the user is responsible for using an adjustable knob to help focus the camera on the desired object. These magnifiers are great for users who are on a budget.

What is Auto-Focus?

Some magnifiers are available as auto-focus cameras which means the camera automatically focuses on the desired object. Phone books are usually tough to magnify, but not with Telesensory's auto-focus Magnifiers. They read into the curved binding with ease. Want to read a prescription? That too, is much easier with auto-focus. Just put the bottle under the camera and

Colour or Black & White?

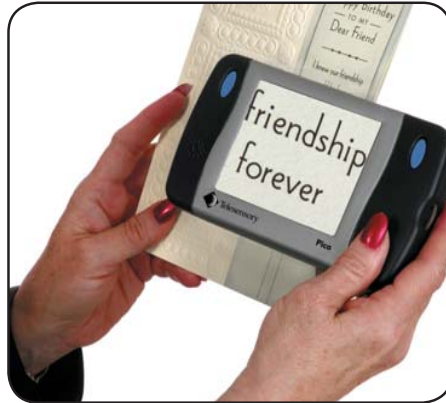

Another important option is choosing whether you will want colour output or black & white output. Video Magnifiers that support colour are a bit more expensive but may be necessary depending on what you will be magnifying. If you're writing checks or reading the newspaper black & white may suffice. If viewing photo's, magazines, puzzles, or stamps then colour would be ideal.

Pico

Handheld Video Magnifier

Model: SUIA-2

Anywhere, anytime, simply turn on the Pico and you have amazing magnification and superior clarity!

Pico fits conveniently in your purse or pocket and the integrated battery makes it easy to take with you everywhere you go. Genie Pro

PC-Compatable Video Magnifier

Model: GEP-3

Now it's easier than ever to stay productive. The Genie Pro combines a powerful magnifying viewer with your computer workstation.

A split screen mode lets you view magnified materials and computer files simultaneously - or toggle between images using a button or optional foot pedal. Genie Pro's auto focus camera brings print, photos, charts and graphs into crisp, clear focus instantly. The system also automatically adjusts for each application's optimum resolution. The system is compatible with most colour monitors and no additional software is needed.

- Magnification to 65X
- Auto Focus
- Full Colour (24 different combinations)
- Split screen partitioning
- Horizontal & vertical line markers

Ovation

Reading Machine

Model: XA-1

Access to printed information just got easier than ever before. With the Ovation, you can accurately and easily scan and store text of any kind and convert it to speed output.

The sleek light-weight design makes it easy to transport, so you can access information in a variety of settings. The flatbed-scanner accommodates newspapers, books, magazines and more. The Ovation has many sophisticated, yet easy-to-use features to access the information you want with wasting time. Adjustable volume, speed and voice tone make audio playback truly personal. Stores "chapters" of up to 20 pages each with a name you give in your own voice. Easily move through your document by page, paragraph, or sentence.

We would like to help you find a product that meets your individual low vision needs. If you would like to speak with someone directly or need additional help determining what product is right for you, please feel free to contact us:
